ABOUT US

Home / About us

Learn The Risk is a US-based, non-profit organization and a powerful force for educating people WORLDWIDE on the dangers of pharmaceutical products, including vaccines and unnecessary medical treatments — that are literally killing us.

Learn The Risk was founded by former pharmaceutical insider Brandy Vaughan, an ex-Merck sales executive who never meant to take on the world's most powerful industry. But she felt she had no choice when the industry's agenda to keep us all sick began to spiral out of control.

Brandy saw the corruption from the inside when she sold a drug (VIOXX) that was literally killing thousands of people. Now Brandy exposes the truth behind the "health" care system and encourages people to make healthy changes NATURALLY.

Please consider donating to support our mission. Every \$ goes straight to the campaign, your contribution may just SAVE a life!

WHAT WE DO

How do we do this? With the most active and powerful billboard and ad campaign, as well as the most impactful outreach program, in the health movement. We host dozens of outreach events, successful social media campaigns, health talks, and our annual health summit.

So how are we doing? Awesome!

- We reach MILLIONS on social media globally every month.
- We reach TENS OF THOUSANDS through this website.
- We have posted 38 billboards, which reach over 30 MILLION.
- We have hosted over 30 campaigns and rallies in the past two years.
- We have produces videos and educational materials that reach over 1 MILLION.

About the Founder

Brandy Vaughan, a former pharmaceutical representative, founded Learn The Risk, a 501(c)3 in response to one of the nation's first mandatory

vaccination for education law — SB277 in California. When working in the pharma industry, Brandy sold Vioxx, a painkiller that was found to double the risk of stroke and heart attacks and was eventually taken off the market. "From that experience, I realized that just because something is on the market doesn't mean it's safe," explains Brandy. " Much of what we are told by the healthcare industry just simply isn't the truth."

After leaving the pharmaceutical industry, Brandy spent eight years living in Europe where she saw how healthcare is done very differently from the US. Upon returning to the States with a vaccine-free son, she was bullied at a pediatrician's office when she asked questions that every parent should ask like, What are the **ingredients** in these vaccines? How come children in other countries are healthier, but receive far fewer

- We do educational talks and events WORLDWIDE.

We are actively changing the conversation around vaccines and the pharmaceutical industry, which should never be trusted with our collective health.

This campaign challenges you to LEARN THE RISK of vaccination. Do the **RESEARCH**. Know the **INGREDIENTS**. Build up your **NATURAL IMMUNITY** — the ONLY type of immunity that truly works. vaccines?

After spending several years researching vaccine ingredients and the diseases they supposedly guard against and the risks of vaccinating versus not vaccinating, Brandy chose to raise her son without chemical interference. "I check food labels. I buy organic whenever possible. I try to minimize my son's exposure to chemicals through lotions, etc. Why would I not want to protect my son from the chemicals in vaccines? Chemicals are chemicals — no matter what form they come in," explains Brandy. "You

owe it to your child to do your own research and not just believe everything you're told, especially when it's only one side of the story — the one that prioritizes profit over your child's health."

Brandy Vaughan has spoken at numerous educational events, rallies, and symposiums and has been featured in various media channels, including InfoWars, The Ritchie Allen Show, The Liberty Beacon, Brian Copeland's radio talk show, Information Press, and Future Money Trends.
